Learn about medical  
tests, including what  
the tests are used  
for, why a doctor  
may order a test,  
how a test will feel,

and what the results  
may mean.

Medical tests can  
help detect a  
condition, determine  
a diagnosis, plan  
treatment, check to  
see if treatment is  
working, or monitor

the condition over time. A doctor may order these tests as part of a routine checkup, to check for certain diseases and disorders, or to monitor your health.

Electrolytes are  
minerals in your  
blood and other  
body fluids that carry  
an electric charge.

Electrolytes affect  
how your body  
functions in many  
ways, including:

The amount of water  
in your body  
The acidity of your  
blood (pH)

Your nerve and  
muscle function  
Other important  
processes

Click on the items  
you consume daily  
to calculate your

caffeine total. Hit "X"  
to exit the calculator.

Safe consumption  
for healthy adults is  
up to 400 mg/day.

Others should  
consult a physician  
for safe moderate  
consumption values.
